

NEW SLAT SHARK SLAT CLEANING SYSTEM

ATTACK SLAG

BETTER SYSTEM – BETTER CLEANING

The **SHARK's rotating cleaning heads** remain straight and grind from the *bottom up*, reducing overall vibration while keeping the slats in place. Our components are HSS steel which deliver a grinding life of over 16 miles – far longer than competitors using hardened steel.

Our **innovative traction system** allows effortless movement across the table.

ADVANTAGES:

- Reduces down time
- Cleaner table
- Increased slat life
- Improves quality of laser cuts
- Reduces strain on operator
- Safer, easier and faster to use
- Removes over 90% of the slag accumulation without grinding the flat surface

“AFTER SEEING THIS MACHINE OPERATE, it is definitely a faster way to maintain your tables, with less operator strain.”
